

Suhita Goswami

Brooklyn, New York

Data Engineer at Google Cloud

Summary

In the pursuit of 'Building to Scale'

Experience

Data Engineer at Google

March 2019 - Present (7 months)

Solutions Consultant at Cloudera

October 2018 - February 2019 (5 months)

Supported clients in building scalable solutions on the Hadoop ecosystem for diverse use cases.

Designed secure data pipelines, resolved cluster scalability, data distribution and processing concerns.

Published technical assets in the form of engineering blogs around Apache Kafka and Apache Impala.

Associate Consultant at Cloudera

June 2017 - September 2018 (1 year 4 months)

Graduate Teaching Assistant at New York University

September 2016 - May 2017 (9 months)

- Implement learning plans designed by the professor for graduate level course of Computer Networks

- Handled queries and grade homework and exams

Business Analyst Intern at Altice USA

June 2016 - August 2016 (3 months)

- Worked with the Business Intelligence and Strategy Group in Data Profiling, Data Quality and BI Development.
- Developed data models and workflows on Alteryx to draw insights on customer demographics and activity on different payment channels.
- Performed data profiling and data quality testing of customer and product usage data on Netezza, Oracle 10g and Amazon Redshift.
- Carried out UAT and QA testing of Data cubes and reports on Microstrategy and Tableau for Cable Operations division.

- Conceptualized, strategized and pitched the 'Business for your Business' product prototype for the Altice USA Intern Shark Tank.
- Worked under the supervision of Director of Data Quality and the Director of Data Visualization for the progress of the projects.

Summer Intern at Hansa Cequity

June 2015 - July 2015 (2 months)

Performed data modeling and statistical analysis to analyze impact of social media on revenue of movies.

- Collated and cleaned data for different India movies and their social media footprints from 2011-2015.
- Designed various use cases and functions to extract useful parameters from raw data.
- Established the validity of relationships between social media platforms and movie revenues using regression models.
- Documented and presented various phases and resulting insights of the project to the company supervisors.

Business Technology Analyst at ZS Associates

September 2014 - May 2015 (9 months)

- Engaged with clients' teams to understand and gather requirements and translate them to effective use cases for data models and calculations.
- Built assets for tracking sales and marketing campaign performance using data visualization and reporting tools such as Tableau and Qlikview to gain insights in the marketing trends in the Pharmaceuticals market in the USA.
- Developed reporting assets in Tableau for clients to leverage from insights on performance trends and major stakeholders in a leading transport company's national presence.
- Wrote technical manuals to work with the designed reports and tools efficiently.
- Carried out duties independently or with minimum supervision in a cross-office environment with project team members spanning multiple cities worldwide.

Education

New York University

Master's Degree, Computer Science, 2015 - 2017

Activities and Societies: Member of Society of Women Engineers

SVKM's NMIMS Mukesh Patel School of Technology Management

Bachelor of Technology (B.Tech.), Information Technology, 2010 - 2014

Activities and Societies: Member of Model United Nations Society. Participated and won awards at national level Model United Nations Conferences

LinkedIn® Recruiter

2 people have recommended Suhita

"I worked with Suhita at ZS Associates where she impressed me with her analytical skills and a passion for continuous learning. She is highly professional and worked hard to ensure best possible results. She is a fast learner and I found her to be exceptionally easy to work with."

—Malvika Khiwal, Senior Data Engineer, Slalom, managed Suhita at ZS Associates

"Suhita is an intelligent, self motivated and resourceful person, capable of producing very high quality work individually or as part of a team. Her expertise on Tableau proved to be vital in the success of her projects. She has an eye for detail and has strong analytical and problem solving skills. She leads by example and is a trusted colleague."

—Swagat Kabi, Business Operations Associate Consultant, ZS Associates, worked directly with Suhita at ZS Associates
